AQUAFIN

AQUAFIN®-2K/M was developed to satisfy a demand for a truly flexible cementitious coating, not only in terms of physical properties, but also in terms of application methods.

AQUAFIN®-2K/M was highly engineered to provide the utmost quality in a cementitious waterproofing membrane. It creates a seamless, monolithic coating which easily conforms to many substrates, making it perfect for almost all waterproofing needs!

- Fountains
- Plaza decks
- Swimming pools
- Balconies
- Water tanks
- Foundations
- Mechanical rooms
- Interior and exterior, above or below grade

AQUAFIN®-2K/M

Flexible cementitious waterproof coating

- + Easy Application
- + Excellent Adhesion
- + Breathability
- + Green - Qualifies for LEED® points
- = Ultimate Waterproofing Flexibility

FLEXIBLE.

- Excellent elongation
- Great crack bridging properties
- Strong bond to many substrates
- UV Resistant stand alone finish
- Available in various colors
- Can be covered with tile, paint, etc.
- Applied by brush, roller, trowel or appropriate spray equipment.

Can your cementitious coating do this?

AQUAFIN®-2K/M can bridge cracks up to 1/16" and has up to 85% elongation*. The perfect solution for waterproofing substrates prone to movement.

* according to ASTM D 412-98a
