

# AQUAFIN®-IC

Integral crystalline waterproofing slurry

**Zip it!**

**Self healing waterproofing that lasts the life of your concrete.**

Production and quality control:  
AQUAFIN®-IC is produced in Elkton, MD, USA.

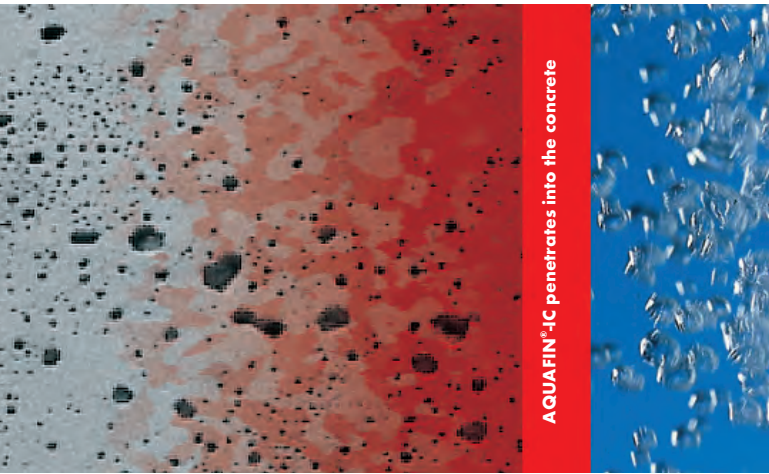

All AQUAFIN products go through effective quality control in the QC-laboratories at the plant site.

**AQUAFIN**

AQUAFIN®-IC penetrates into the concrete

**AQUAFIN®-IC** is a single component crystalline waterproof coating. Specially formulated chemicals penetrate into the concrete substrate creating an integral waterproof barrier. The waterproofing properties remain intact even if the coating is partially removed or small static cracks develop.

## ZIP IT!

Static shrinkage cracks commonly form in concrete over time

The chemicals in AQUAFIN®-IC react when water enters the cracks, beginning the crystalline growth process.

The crystals completely seal the cracks, making your concrete waterproof!

# AQUAFIN®-IC

Integral crystalline waterproofing slurry

## A permanently active waterproof solution.

### DURABLE

- Resistant to hydrostatic pressure (up to 140 m [200 psi] +/- side)
- Waterproofing properties stay intact, even if the coating gets damaged

### APPLICATIONS

AQUAFIN®-IC may be used on new or old structurally sound concrete surfaces not subject to movement. It is also suitable for concrete, masonry or as a dry shake on fresh concrete slabs.

- Potable water tanks
- Waste water treatment plants
- Tunnels
- Elevator pits
- Manholes
- Foundations

### ADVANTAGES

- Self healing (static cracks up to 0.4 mm · 1/64")
- Environmentally friendly
- VOC = 0 (0 g/L)
- Easy to apply - only 1 component
- Economical, low consumption
- Fast setting
- NSF/ANSI 61 certified for potable water
- Qualifies for LEED® points
