

## Not just another decorative coating system

Decorative has been done. Waterproof, flexible and decorative are the future!

There are multiple decorative coating systems available on the market today, however none are waterproof. That means areas also prone to water exposure require additional steps and products to be protected.

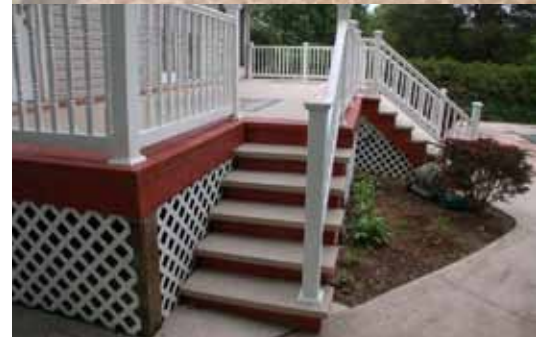

Look no further: **DECORFLEX®** is a fully waterproof, flexible and decorative coating system providing excellent durability combined with an extensive range of design possibilities.

- Waterproofs and beautifies
- UV, weather, freeze/thaw resistant
- Withstands pedestrian & vehicular traffic
- Excellent adhesion to many substrates

Our core business is waterproofing. Trust the products developed by the experts.

### DECORFLEX® System components at a glance:

- **DECORFLEX®-P**  
Primer for non-porous and non profiled substrates. Also use when temperatures exceed 80°F during application.
- **DECORFLEX®-SK**  
Skim coat for use where negative side hydrostatic pressure from ground or rain water can be expected.
- **DECORFLEX®-HD**  
Heavy duty base coat. 2-component, highly abrasion resistant, load bearing waterproof "structural" base coat.
- **DECORFLEX®-R**  
Regular top coat. 2-component, highly abrasion resistant, load bearing waterproof topping coat.
- **DECORFLEX®-F**  
Fine top coat. 2-component, abrasion resistant fine granular wear coat, applied over the "R" or "HD."
- **DECORFLEX®-UF**  
Ultra fine top coat. 2-component, abrasion resistant very fine granular wear coat, applied over the "R" or "HD."

# Sample finishes created with DECORFLEX®

**...let your imagination run wild!**

Mimic traditional wall and floor coatings by troweling or spraying, and use stencils and engraving techniques to achieve intricate patterns.
